Abdellah Abdelbaki

4th year engineering student

Subject: Application for 4th year engineering internship

Dear Mr. Nissoul,

I am writing to express my interest in the summer internship program with your web-programming company. I learned about your company through an instagram advertisement and after visiting your website and learning even more about the positions you offer internships for, I think I would be a perfect fit for it with the skills and studies I have.

As a Networks, Programmable Systems and Services Engineering student at the Moroccan School of applied sciences Marrakech "ENSA", I have the honor to ask you to kindly accept my request for an internship within your company as part of an internship contracted for a period of 1 month or more starting from July 11, 2022.

I have chosen your company because your sector of activity corresponds perfectly to my future professional aspirations. I will therefore be honored to perfect my knowledge by joining your team as an intern. Rigorous and versatile, I would be delighted to bring my skills acquired during my curriculum as well as my deep enthusiasm to work as a member of your web developpement team.

I look forward to the opportunity to discuss my skills and qualifications in person at your earliest convenience. You can reach me by my email or phone for further details.

Thank you for considering accepting my internship application.

Sincerely,

Abdelbaki Abdellah.
